A decorative graphic on the left side of the page consists of overlapping colored squares (yellow, red, blue) and a black crosshair.

## Individual Registration Protocol

---

1. Client Request for Registration with Azera Global on the main Azera Global Website
2. Client is redirected to Azera Global Application Server
3. Application Server sends Encryption App to client
4. Client installs Encryption App on his PC. And uses the App to access the key server
5. Key Server issues a special key to client and the Admin Server
6. Client sends information required to register with Azera Global. This session is encrypted with the temporary key issued to the client.
7. Azera Global Admin processes the application and connects to the Visa or Mastercard Bank Server and processes the payment procedures.
8. Client has been approved and a Private Domain Name Server is instantiated for the new client.
